Prevents contamination of soil by disposing of waste products in line with legislation (waste regulations).

Livestock

Competency: Supports successful production of sheep through knowledge and skills that support and enhance the business.

Knows and understands: How to identify different breeds of sheep.

That the electronic (yellow) tag should be placed in the left ear and that lambs destined for slaughter before 12 months of age need the electronic tag only.

When crutching or dagging should be carried out and why it is important.

When foot trimming should be carried out and why it is important.

What method is used on farm including plunge dipping, sheep shower, jetter or pour-on. Understands to minimise contact with treated animals.

Wet-adoption and why it's used.

Symptoms of hypothermia (low body temperature) in lambs and the need to take action to warm the lamb.

That tail docking and castration too early can interfere with lamb suckling and prevent adequate colostrum intake.

That tail docking and castration can be carried out with rubber ring within the first week of life only.

That short docking of tails is not allowed. Knows that docked tail length must cover at least the anus of males and at least the vulva of females.

Skills:

Prepares the animal for shearing/wool handling.

Assists with crutching or dagging.

Assists with foot-trimming.

Assists with external parasite control by the application of veterinary medicine/ pesticide to the outside surface of the sheep.

Assists with tail docking and castration under supervision.

Carries out electronic identification device tagging procedures under supervision.

Technical Operations

Competency: Supports successful technical operations through knowledge and skills of technology, machinery, vehicles and structures that enhances production and business viability.

Knows and understands: The business security process.

How to select correct fuel when operating vehicles and machinery.

Which driving licences are needed and when the renewal period is due, relevant to the job.

How to operate machinery safely.

Basic vehicle maintenance and operation, including setting up and calibration to achieve required results.

The importance technology plays within the industry and the opportunities available to them to use technology.

How electronic systems work on-farm and what their role is.

The value of collecting good quality data and how it can be used to make decisions.

The business policy around use of mobile and smart phones for business and personal use at work.

How to use technology-based systems to collect data to improve efficiency of operations.

How to adapt their driving giving due care, respect and attention to conditions (slope, wet, etc), risks (overhead power cables, low buildings etc) and when towing loads.

How to safely operate a light utility vehicle (LUV), with trailed equipment or a mounted load, on flat or hilly terrain.

Competency profile: Sheep stockperson

Skills:	Ensures familiarity with farm layout.
	Identifies problems, faults and inconsistencies requiring action.
	Demonstrates familiarity with range of other technologies and aids on the farm.
	Applies the value of collecting good quality data and how it can be used to make decisions.
	Holds a current and relevant driver's licence.
	Demonstrates appropriate instruction, training and certificates for driving vehicles used on farm.
